

Episode 23 Downloadable: 5 Steps to Planning Complete Intersections

What do Transportation Planners need to know about Complete Streets and Intersections?

Complete Streets are an approach to planning streets that enable safe access for everyone on our roadways, no matter their mode, age, or ability. Addressing intersection design and operations is critical to a safe and connected network for all modes, especially in an effort to build complete streets and achieve safety goals.

5 STEPS TO PLANNING COMPLETE INTERSECTIONS

Step 1 Identify Connections in the Walking and Biking Network

Step 2 Assess the Quality of Existing Infrastructure

Step 3 Separate users in time and space

Step 4 Improve signals and technologies for all modes

Step 5 Develop and adopt supporting policies
